

With our EHR conversion to Meditech, our patients will need to create a new Patient Portal account to access their provider, medical records, view test results, and more.

MEDITECH EXPANSE

Register for a new Patient Portal Account by contacting us, or conveniently at your next appointment

1. During your next visit, or by contacting us directly, (970) 878 - 5047, provide us with your email address where we can send your Patient Portal **enrollment invitation**.
2. Once you receive the email invitation, **click the link** included at the bottom of the email.
3. After clicking the link, a new browser tab will open, redirecting you to the Patient Portal login page.
4. Your temporary credentials will already be **visible** in the **Username** and **Password** fields.
5. Next, you will select **Sign In**, which will then redirect you to a page where you will be required to enter a secure Username, Password, and select/answer a Security Question of your choice.
6. Read and agree to your User Agreement.
7. The screen will then redirect you to the Patient Portal homepage, allowing you to view information related to your medical record.
